GLOBAL ACCESS TECHNOLOGIES - ROPE ACCESS & TRAINING

## INNOVATIVE TECHNICAL SOLUTIONS

# ABOUT US

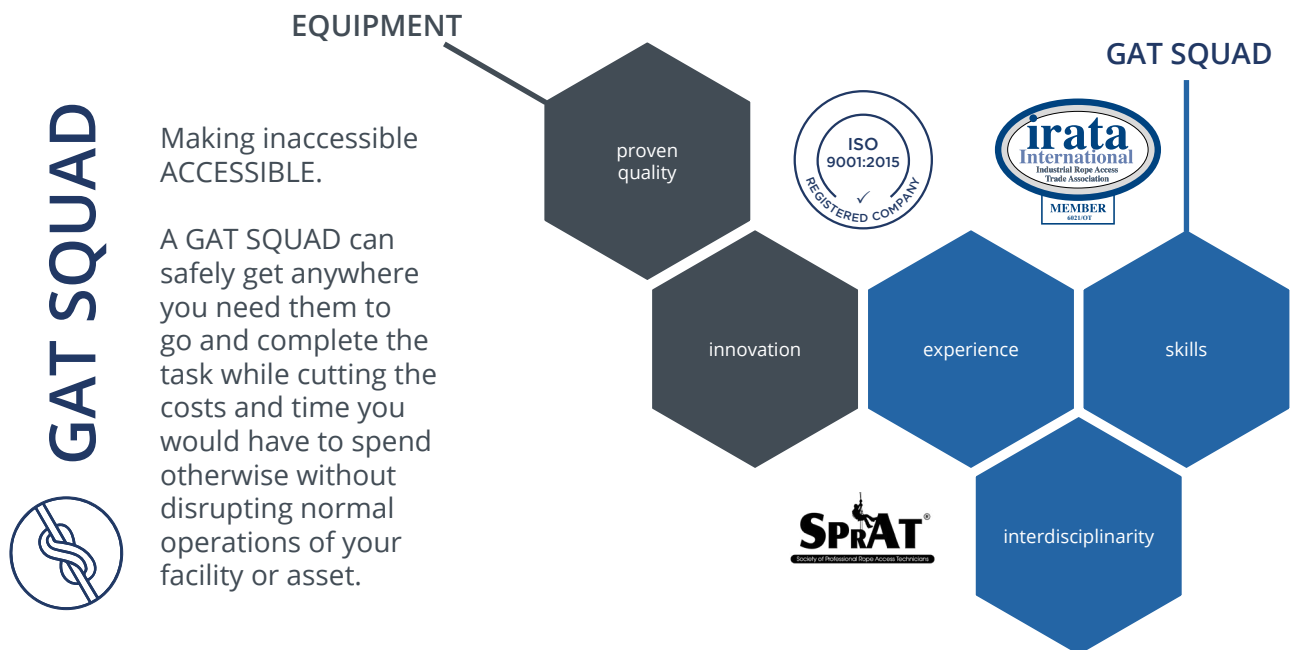

GAT International offers a wide range of specialist services using rope access technology. Our comprehensive solutions are used, primarily, in the following sectors: construction, energy, maritime, and oil&gas. We carry out demanding works on land and at sea, often in difficult conditions, while maintaining the highest standards of safety.

All projects are carried out by carefully selected teams of experts from various fields. Our teams are being referred to as "GAT SQUADS" and they are characterised by following features:

- ✓ Interdisciplinary
- ✓ Highly qualified and efficient
- ✓ Capable of working under any conditions

Our specialist database includes highly trained workers and technicians with the necessary skills and qualifications in mechanics, engineering, construction, assembly works, and more.

GAT is a certified "Operator & Trainer" IRATA member and is ISO 9001:2015 certified.

# SECTORS

## CONSTRUCTION

The rapid increase in competition in the construction sector creates greater need for cost-effective solutions. GAT International, thanks to the expert use of rope access, offers low cost services while maintaining high quality and safety.

## ENERGY

We cooperate with engineers and technicians certified by IRATA and GWO specialising in various fields — through this cooperation, we are able to provide integrated solutions for power plants that use both traditional and alternative energy sources.

## MARITIME

Our company provides efficient and innovative inspection, maintenance and repair services for the maritime industry. Considering the great importance of performance in this sector, we provide services that, thanks to rope access technologies, do not interfere with the day-to-day operation of the facilities.

## OIL & GAS

GAT International has the knowledge stemming from many years of experience in the oil and gas industry. Our employees are qualified to work under difficult conditions, typical of this sector, and through the usage of rope access techniques can easily access hard-to-reach places.

# SERVICES

We provide specialised services onshore and offshore for all industrial sectors, including:

- works on drilling platforms
- construction and repair of marine objects, pipelines
- construction and maintenance of wind turbines
- works at power plants of various types
- works at cooling towers, chimneys
- works at stadiums, skyscrapers, bridges, flyovers
- assembly and dismantling of steel structures, masts, antennas
- cleaning tanks, silos
- work on various projects requiring the use of non-standard access techniques

In addition, we offer:

- permanent and temporary security fall-protection systems
- personal protective equipment (PPE)
- rescue supervision
- inspection and validation of PPE

## CONSTRUCTION SERVICES

Putting up scaffoldings, placing lifts or cranes is time consuming, expensive and often technically impossible to apply. In such cases, the best solution is to use industrial climbing techniques, the so-called rope access. Our company has a database of several hundred highly qualified rope access technicians who can carry out works such as:

- Painting, coating
- Welding, sealing
- Facade works
- Sandblasting
- Glazing
- Anti-corrosion works
- Insulation works
- Assembly and dismantling
- Checking pipelines
- Service works, modernization
- Constructing security fall-protection systems
- Protection systems and demolition

## INSTALLATION SERVICES - assembly and dismantling

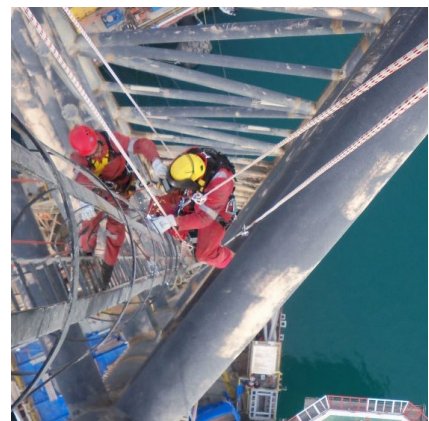

Installation of wiring, gas trains, etc often involves working in hard-to-reach places. Rope access technicians can safely move in any direction and under any conditions. We offer, among other things, installation works of:

- Electrical wiring
- Photovoltaic systems
- Fire protection systems
- Hydraulic installations
- Pipelines
- Drainage systems
- Power lines
- Ventilation systems

## REPAIRS AND MAINTENANCE

In order to ensure long-term and uninterrupted operation of buildings, facilities, machinery and equipment, GAT International offers professional solutions, both onshore and offshore. Our specialists can manage, among others:

- Corrosion removal and prevention
- Repair of industrial chimneys and bridges
- Control and maintenance of pipelines
- Protection and repairs of buildings and structures
- Repair and lamination of wind turbine blades

### SURVEYS AND INSPECTIONS

In order to ensure the safety, efficiency and continuous operation of a facility specialised testing and examinations are required. GAT International carries out advanced technical inspections such as NDT and DROPS inspections.

### INDUSTRIAL CLEANING

We clean the surface of buildings and structures made of materials such as: wood, stone, metal, sandstone, glass, and plaster. We have experience in, among others, cleaning tanks, silos, ships, pipelines, windows, and facades of buildings.

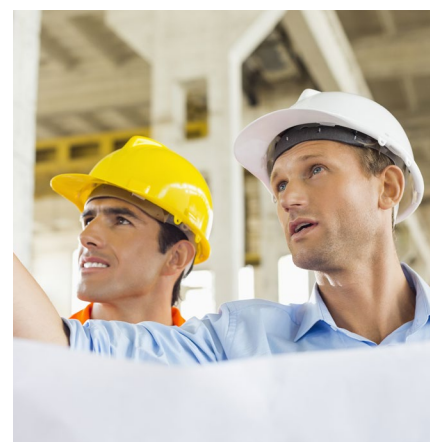

### WORK SAFETY

GAT International has the knowledge and experience necessary to create safe working conditions. We offer clarification of the complicated web of standards, specifications and products. We will advise, select and deliver:

- Permanent and temporary fall-protection systems
- Custom, specialised fall-from-the-heights protection options
- Personal Protective Equipment
- Rescue Survival Specialists, plus:
- we will inspect and validate PPE

### CONSULTING

We provide consulting services based on our own experience in construction, power engineering, oil & gas, and maritime environment sectors, as well as many other industries gained while working around the world (mainly rope access). The know-how we have established throughout over 12 years of gathering experience allows us to provide a high level of practical knowledge backed up by current regulations, norms and international standards. We can help you find the optimal solutions that will deliver the best results while minimising costs.

# WHERE WE OPERATE

---

Our company's distinctive feature is a very short time in which a team of employees, designed to fulfil our client's needs, is able to reach wherever it is needed. This is possible thanks to the large number of experts and partners from around the world that are at GAT International's disposal.

---

## OUR LOCATION

GAT International operates on the international market, offering specialised services taking advantage of rope access technology. We employ thousands of engineers, craftsmen and professionals of various specialties performing tasks onshore and offshore. Currently, we operate in North and South America, Africa, Europe and the Middle East, in countries such as: Brazil, the Philippines, Equatorial Guinea, Canada, Qatar, Germany, Nigeria, Norway, South Africa, Trinidad, United Kingdom, and United Arab Emirates.

# TRAINING

GAT International has an "Operator & Trainer" membership of the International Rope Access Trade Association (IRATA). Our company is one of the leaders in the training and operational services sector, using training methods based on and in compliance with international standards such as: IRATA, SPRAT, FISAT and OTDL.

Our qualified instructors conduct trainings around the world, both in our own training centres as well as at the facilities of our clients. Each course ends with an exam carried out by international, licensed examiners. The awarded certificate is an internationally recognised document, accepted worldwide.

We offer the following training courses:

- IRATA Level 1 / 2 / 3
- SPRAT Level 1 / 2 / 3x
- OTDL Level 1 / 2 / 3
- GWO Basic Safety Training
- Inspection of Personal Protective Equipment (PPE)

Visit [www.gat-int.com](http://www.gat-int.com) or send an e-mail to [training@gat-int.com](mailto:training@gat-int.com) to find out more about the courses, training schedules and registration procedures.

# EQUIPMENT

GAT International offers a wide range of specialist equipment from world-class manufacturers. With the knowledge and experience stemming from working with rope access technology, we offer individual selection and delivery of protective equipment, security devices and fall-protection elements for various groups of users.

In our offer, we have products of leading companies such as:

- Petzl
- Singing Rock
- Ocuñ
- Kong
- Tendon
- Beal
- Rock Empire
- Skylotec
- Protekt
- Kask
- Rock Exotica
- Rocca
- Kaya Safety
- ISC
- Teufelberger
- Mammut
- Edelrid
- Safe Tec

*Contact us by e-mail or phone for a detailed offer.*

# OUR STRENGTHS

Based on many years of experience and unrestricted access to qualified personnel, we successfully implement various types of projects requiring non-standard access techniques. We focus on:

## QUALITY

Using the experience and knowledge of our experts from various fields, we are able to plan an effective way of accomplishing our mission and delivering high quality results.

## SAFETY

We follow the stringent safety standards. Our employees must have appropriate qualifications and certifications, comply with safety regulations and procedures of the international association IRATA, as well as meet the quality standards of ISO 9001: 2015.

## INNOVATION

Our specialists from various technical and engineering fields, combined with verified, high quality equipment, enables us to offer our clients innovative solutions that will improve the functionality and extend the life-cycle of their facilities.

## EXPERIENCE

The founders of the company have 40 years of experience in project management in the industrial and construction sectors, and have been successfully carrying out works using rope access technology for more than 12 years.

## INTEGRITY

All employees and partners of GAT International operate in accordance with the highest ethical and professional standards, because we believe that business relationships should be based on honesty, mutual respect and trust.

## AVAILABILITY

An important feature of our company is “always being on stand-by”. We manage our projects and staff in a way allowing us to provide our clients with access to our services whenever needed, regardless of location.
